

How to add and set up new apps

On this page, you can add Indeed AM ESSO Agent applications to the Indeed AM system.

i If you would like to add ESSO applications, please register your Enterprise SSO license. You do not need to manually add other system components – they will be automatically uploaded following the license registration.

How to upload a template

1. Open your **Admin Console**.
2. In the left-side navigation bar, in the **Settings** section, select **Applications**.
3. Click **Add a new application**.

Applications

[+ Add application](#) [Delete](#)

4. In the new window, select the **Enterprise SSO integration module**, choose the template file for your app, and click **Create**.

Icons

The information contained in this section enables quick launch of your app.

If this information was added during the template creation, it will be displayed in this section.

1. Click **Add an icon**.
2. In the **Description** field, please specify additional information about the new icon.
3. In the **Type** field, select **Command line**.
4. In the **Address** field, please insert the complete command to launch the app and click **Add**.

 The screenshot shows information for the web application.

Password policy

In this section, you can set the password generation policy that will apply when you need to change your password in the app.

1. In the **Minimum password length** field, please indicate the minimum number of characters required for a new password.

2. In the **Maximum number of occurrences for each character** field, please indicate the permitted occurrences for each group of characters. To enable this parameter, you need to create a group of characters.

 When adding a user group, please indicate a relevant group of characters in the **Group characters** field.

a. Click **Add a group**.
