

User card

A user card contains general information about the user: Active Directory profile data (If Active Directory is used as Indeed Certificate Manager system user directory), information about smart cards and recent user events. If the user has no smart cards, the support service operator can assign or issue one to him or her.

Available operations:

- [Photo uploading](#)
- [User unlocking](#)
- [Resetting answers to security questions](#)
- [Resetting user password](#)
- [Smart card assignment](#)
- [Smart card issuance](#)
- [Reset PIN](#)
- [Smart card unlocking](#)
- [Disabling and enabling smart card](#)
- [Smart card revocation](#)
- [Smart card withdraw](#)
- [Smart card replacement](#)
- [Smart card update](#)
- [Smart card issuance with printout](#)
- [Smart card bulk issue](#)
- [Recent events](#)
